

GDW628

Winter tire for Regional Haul & Mixed Service application

M+S

Features		Benefits
	Wide-angle longitudinal/transverse zigzag grooves	Offers excellent traction on snow covered roads
	Polygonal Blocks with sharp edge design	Promote tire's snow embedding performance
	Different depth sipes on the blocks	High traction & braking on wet and dry surfaces
	Tire-bar between blocks with sipes design	Prevents heel & toe irregular wear
	Open-shoulder with "trumpet" type design	Allows mud and slush evacuation through the open shoulder grooves
	Special tread compound suitable for all seasons	Offers good wear performance and cutting resistance
